

CST8502

Machine Learning

Course Outline

2025-2026

Pre-requisite(s)	N/A
Co-requisite(s)	N/A
Prepared by	Anu Thomas
Approved by	Jennifer Lexmond, Chair, ICT - Applications & Programming
Approval date	Monday, June 9, 2025
Normative hours	70.00
Grading system	A+ Through F

Applicable Program(s)	Level	Core/Elective
1535X01FWO - AI Software Development	1	Core
1535X03FWO - AI Software Development	1	Core

Land Acknowledgement

Algonquin College campuses in Ottawa, Perth and Pembroke are located on the traditional unceded, and unsurrendered territory of the Anishinàbe Algonquin People. The Algonquin People have inhabited and cared for these lands since time immemorial. We take this time to express our gratitude and respect to them and to the land for all that it has provided and will continue to provide.

As a post-secondary institution, we acknowledge the harms done to Indigenous Peoples and are committed to learning from the past. We pledge to promote healing and resilience as we move forward in partnership with the Algonquin Nations, First Nations, Métis, and Inuit Peoples in a spirit of reconciliation.

While we recognize that territorial acknowledgements are only one step in cultivating greater respect and inclusion of Indigenous Peoples, we commit to accompanying these words with actions. We are dedicated to building a future and community that is better for all.

We pledge to continue exploring and making meaningful contributions to the Truth and Reconciliation Commission of Canada’s Calls to Action.

Learn more about the College's commitment to Truth and Reconciliation: <https://www.algonquincollege.com/tri>

Course Description

One of the primary artificial intelligence techniques is machine learning, which involves developing datasets to train models forming the basis of decision-making facilities. Students develop machine learning representations and build datasets to train the corresponding algorithms used to design, develop and implement intelligent systems.

Vocational Learning Outcomes

This course provides the opportunity for you to achieve the following outcomes:

1535X01FWO - AI Software Development

VLO 1 Analyze, design, and implement secure Artificial Intelligence (AI) software systems through the application of systematic approaches and methodologies to meet organizational needs. (T, A)

- VLO 2 Develop artificial intelligence models to identify patterns, provide insights, recommend actions or perform tasks autonomously on behalf of stakeholders. (T, A)
- VLO 6 Evaluate and deploy custom-made and commercial AI software components for the purpose of integration into software solutions. (T)

1535X03FWO - AI Software Development

- VLO 1 Analyze, design, and implement secure Artificial Intelligence (AI) software systems through the application of systematic approaches and methodologies to meet organizational needs. (T, A)
- VLO 2 Develop artificial intelligence models to identify patterns, provide insights, recommend actions or perform tasks autonomously on behalf of stakeholders. (T, A)
- VLO 6 Evaluate and deploy custom-made and commercial AI software components for the purpose of integration into software solutions. (T)

Assessment Levels —T: Taught A: Assessed CP: Culminating Performance

Course Learning Outcomes / Elements of Performance

When you have earned credit for this course, you will have demonstrated the ability to:

1. Explore the fundamental concepts of machine learning and AI problems.

- Discuss supervised, unsupervised, and semi-supervised learning.
- Explain various stages of CRISP-DM.
- Use the terms classification, regression, clustering, and outlier detection with accuracy and consistency.
- Explore different applications of machine learning in various sectors.

2. Prepare datasets to perform data analysis.

- Distinguish between different types of statistical data.
- Explain basic statistical definitions and probability distributions to support data analysis.
- Discuss the mechanisms for obtaining data including downloading and Web-scraping.
- Preprocess the data (data cleaning, handling missing data, handling duplicate data, transform data) to perform modeling
- Explore how to extract and select relevant features for data analysis

3. Train models to solve problems involving classification, regression, clustering, and anomaly detection.

- Create train and test sets using approaches including cross-validation, percentage split, and leave one out.
- Discuss overfitting and how to avoid it.
- Normalize data to apply ML techniques.
- Perform classification, clustering, and outlier detection using various ML techniques.
- Discuss simple and multiple linear regression, multi-variate regression, logistic regression, and create regression models

4. Evaluate performances of various machine learning techniques for better performance.

- Evaluate the performance of various ML techniques.
- Discuss confusion matrix, TPR, FPR, accuracy, precision, recall, specificity, and ROC Curve
- Fuse various models to enhance performance.
- Discuss ensembling techniques like bagging and boosting.

5. Report results using data visualization techniques.

- Draw conclusions from analysis.
- Generate various graphs, charts, and plots (scatter plots, lines graphs, bar graphs, etc.).
- Write effective reports that include the analysis and results.
- Prepare presentations with various ML results and its visualizations.

Learning Resources

- **Required Textbook**
- Kelleher, J. D., D'Arcy, A., & Namee, M. B. (2020). Fundamentals of machine learning for Predictive Data Analytics: Algorithms, worked examples, and case studies, Second Edition. Cambridge, MA: The MIT Press. ISBN: 978-0-262-04469-1

- **Recommended Resources**Witten, I. H., Frank, E., Hall, M. A., & Pal, C. J. (2017). Data mining: Practical machine learning tools and techniques. Morgan Kaufmann.
- Cady, F. (2017). The data science handbook. John Wiley & Sons, Inc.
- Bishop, C. M. (2016). Pattern recognition and machine learning. Springer New York.
- Additional books, articles, websites, etc. that students can use if they want to excel in the course will be given as required.

- **Hardware and Software**
- Weka 3.8 (can be downloaded from <https://www.cs.waikato.ac.nz/ml/weka/downloading.html>)
- Python 3.8 or later
- PyCharm IDE
- RapidMiner Studio

To access your course list, learning resources and costs, visit [Booklist](#).

Please note that a learner must be registered in a specific course or program to view this information.

Program tuition and fees can be found on the [Tuition and Fees Estimator for Full-time Programs](#) page.

Learning Activities

During this course, you are likely to experience the following activities:

- Lectures and demonstrations
- Hybrid learning activities
- Class discussions
- Presentations
- Labs
- Individual/Group Assignments
- Quizzes
- Tests
- Group Project

Students will be given a list of required reading material that includes articles on Machine Learning practices and case studies for business decision support.

Hybrid Activities

There is a hybrid activity each week as an extension to the lecture, these are asynchronous activities in Brightspace and are required.

Lectures and Readings

Theoretical course material will be presented, aided by the use of presentations, videos, demonstrations, and brief lecture notes.

This course is hybrid. Approximately one hour per week outside of regular classroom lecture time will be required to review online materials and complete activities. This is in addition to your own study time.

Students are expected to attend all lectures and review all materials posted on Brightspace.

Students are expected to find and read applicable material in the textbook, and to be prepared to answer oral or written questions in lectures.

Students are encouraged to ask questions during lectures and to consult with the professors on topics that they feel they do not clearly understand. Students are also encouraged to ask/answer questions or initiate discussions using the Discussion Board forums in Brightspace.

Professors will inform students, at the beginning of the course, of suitable times for consultations.

Labs and Assignments

Students will apply the lecture material to a series of assignments, which are closely integrated with the lecture materials.

Students should seek advice and help from the professor in the laboratory.

Larger lab assignments can be completed on laptops during lab time or outside of the lab if more work is required.

All labs and assignments have to be demoed to get grades.

Project

The students will undertake a mandatory business intelligence project with a focus on deriving insights from data using basic data mining techniques and analysis, within a statistical development environment. The assignments will form the basis of a large semester-long project so that by the end of the semester the term projects consists of tying together the components built from the assignments. They will submit a formal report, complete with recommendations, supported by analysis and visualization. The students will make a formal presentation (mandatory) of their report, targeting an executive audience.

Pre-defined Evaluation / Earning Credit

The following list provides evidence of this course's learning achievements and the outcomes they validate:

Assignment(s) (20%)

Validates Outcomes: CLO 1, CLO 2, CLO 3, CLO 4, CLO 5

Lab Activities and/or Practical Assessments (20%)

Validates Outcomes: CLO 1, CLO 2, CLO 3, CLO 4, CLO 5

Final Project (20%)

Validates Outcomes: CLO 1, CLO 2, CLO 3, CLO 4, CLO 5

Midterm Exam(s) (15%)

Validates Outcomes: CLO 1, CLO 2, CLO 3, CLO 4, CLO 5

Final Exam (25%)

Validates Outcomes: CLO 1, CLO 2, CLO 3, CLO 4, CLO 5

Prior Learning Assessment and Recognition

Students who wish to apply for Prior Learning Assessment and Recognition (PLAR) need to demonstrate competency at a post-secondary level in all outlined course learning outcomes. Evidence of learning achievement for PLAR candidates includes:

- Portfolio
- Challenge Exam
- Project/Assignment

Course Related Information

Please refer to the Course Section Information (CSI) / weekly schedule for specific course-related information as provided by your professor. The quizzes and final exams will consist of theoretical in-class components discussed during in-class lectures and applied during practical in-lab sessions.

In order to pass the course, the student must have a grade of at least 50% (or “D-”) on both the theory component as well as in the applied (projects and assignments combined) component. i.e. Even if your combined grade exceeds 50% for the entire course if you fail either the theory component or the applied component you will not achieve a passing grade in the course.

All practical work has to be demoed to get grades.

All students are required to do the project, submit the report, and present their findings. The final project is mandatory for the successful completion of the course.

All students are required to write the final exam. There are no provisions for 'making up' a missed final exam.

Program Information

Department Information

STUDENT ACADEMIC RESPONSIBILITIES

Each student is responsible for:

- Knowing the due dates for marked out-of-class assignments.
- Attending all classes and knowing the dates of in-class marked assignments and exercises.
- Maintaining a folder of all work done in the course during the semester for validation claims in cases of disagreement with faculty.
- Keeping both paper and electronic copies of all assignments, marked and unmarked, in case papers are lost or go missing.
- Regularly checking both Brightspace announcements as well as one's Algonquin e-mail account for important messages from both professors and college administration.

- Participating in on-line and classroom exercises and activities as required.
- Retaining course outlines for possible future use to support applications for transfer of credit to other educational institutions.

Department Grading Policy - For all courses that have both a theory and practical (lab) component, students must have a grade of at least 50% (or "D-") on both the theory component as well as in the practical (i.e. lab) component in order to achieve a passing grade in the course. i.e. Even if your combined grade exceeds 50% for the entire course, if you fail either the theory component or the practical component, you will not achieve a passing grade in the course.

Lab/Practical Assessment Demonstration "Demo" Requirements - Certain courses require students to demo their work after it has been submitted. These will be scheduled by the professor and involve 1-2 rudimentary questions to assure the professor that the work submitted by the student is their own. Demos are not graded items - the work submitted is graded. However, where demos are required, if a student does not demo their work or if the professor deems the answers to the questions unsatisfactory, the work will not be graded (i.e. grade of 0 on the lab or practical assessment).

Department Academic Dishonesty Policy - Academic Integrity is very important to all of our faculty and administrative staff and as such, measures have been put into place to detect all forms of academic dishonesty, including plagiarism of code. If plagiarism is detected by a professor, the incident will be reported and investigated. If the findings of the investigation are that a student has submitted plagiarized work as their own, they will be subject to the following policy:

1. The first offence will result in the plagiarized assessment being assigned a grade of 0.
2. The second offence will result in the assignment of a grade of F for the course.
3. The third offence will result in removal of a student from the program of study.

Harassment/Discrimination/Violence will not be tolerated. Any form of harassment (sexual, racial, gender or disability-related), discrimination (direct or indirect), or violence, whether involving a professor and a student or amongst students, will not be tolerated on the college premises. Action taken will start with a formal warning and proceed to the full disciplinary actions as outlined in Algonquin College Policies - HR22 and SA07.

Harassment means one or a series of vexatious comment(s) (whether done verbally or through electronic means), or conduct related to one or more of the prohibited grounds that is known or ought reasonably to be known to be unwelcome/unwanted, offensive, intimidating, derogatory or hostile. This may include, but is not limited to: gestures, remarks, jokes, taunting, innuendo, display of offensive materials, offensive graffiti, threats, verbal or physical assault, stalking, slurs, shunning or exclusion related to the prohibited grounds.

For further information, a copy of the official policy statement can be obtained from the Student Association.

Violation of the Copyright Act

General – The Copyright Act makes it an offence to reproduce or distribute, in whatever format, any part of a publication without the prior written permission of the publisher. For complete details, see the Government of Canada website at <http://laws.justice.gc.ca/en/C-42> . Make sure you give it due consideration, before deciding not to purchase a textbook or material required for your course.

Software Piracy - The Copyright Act has been updated to include software products. Be sure to carefully read the licensing agreement of any product you purchase or download, and understand the terms and conditions covering its use, installation and distribution (where applicable). Any infringement of licensing agreement makes you liable under the law.

Disruptive Behaviour is any conduct, or threatened conduct, that is disruptive to the learning process or that interferes with the well being of other members of the College community. It will not be tolerated. Members of the College community, both students and staff, have the right to learn and work in a secure and productive environment. The College will make every effort to protect that right. Incidents of disruptive behaviour must be reported in writing to the departmental Chair as quickly as possible. The Chair will hold a hearing to review available information and determine any sanctions that will be imposed. Disciplinary hearings can result in penalties ranging from a written warning to expulsion.

For further details, consult the Algonquin College Policies AA32, SA07 and IT01 in your Instaguide.

College Related Information

Algonquin College's policies have been developed to ensure the health, safety and security of all students, faculty and staff, and the proper and fair operation of the College as an academic institution and employer. Please refer to the Algonquin College Policies website for the most current policy information available at <http://www.algonquincollege.com/policies/>.

Students are especially encouraged to be aware of the following College expectations

Academic Integrity

Algonquin College is committed to the highest standards of academic integrity, and students are expected to uphold these standards throughout their learning journey with the College and post-graduation. Any academic work submitted by a student is expected to be their own work, unless designated otherwise, all human and technological assisted generated sources must be attributed. Refer to the College's [Library web site](#) for attribution support and resources. All students are expected to be familiar with the College's [AA48: Academic Integrity](#) policy which outlines student and staff roles and responsibilities, the process for addressing, determining and ruling final academic decisions regarding violations of academic integrity as well as what represents academic misconduct. Students with any questions about academic integrity course expectations including but not limited to use of technology, generative AI and other resources to support completion of coursework, are encouraged to speak to their professor and refer to the course weekly schedule, assessment instructions, course announcements and materials.

Centre for Accessible Learning (CAL)

Students with visible and/or non-visible disabilities are encouraged to register with the [Centre for Accessible Learning \(CAL\)](#) in order to be eligible for appropriate learning supports and/or accommodations. Students are strongly encouraged to make an appointment with the Centre for Accessible Learning as early as possible when starting a program. Once your needs are identified, a Letter of Accommodation (LOA) will be issued which you can share with your professors through the [CAL Student Portal](#). If you are a returning student, please ensure that professors are given a copy of your LOA each semester.

Test Accommodations for Students Registered with CAL

Students who require testing accommodations will book their tests/exams through the [CAL Student Portal](#). It is important to note the posted test/exam booking deadlines for the term. Test booking deadlines are communicated through CAL Disabilities Counsellors, CAL Testing Services, and other college wide communication. Additional information on the steps to book accommodated tests/exams with CAL Test Services can be found at [Step-by-Step Overview](#).

Retroactive Accommodations

Students are expected to meet evaluation and completion deadlines as stated in course outline and weekly schedule documents. In circumstances where evaluation deadlines are missed or student performance has been affected by a temporary, significant and/or unanticipated change in functional ability related to disability (including mental health), interim or retroactive accommodations may be considered. For these instances it is advised you reach out to CAL or your professors as soon as possible. For other situations where deferral of evaluations may be warranted, please consult Algonquin College Policy [AA21: Deferred Evaluation](#).

Network Credentials and College Email

Students at Algonquin College are provided with a college email account. This is the address that will be used when the College, your professors, or your fellow students communicate important information about your program or course activities. Your network credentials can be found in the [ACSIS portal](#) and you are expected to check your Algonquin email regularly and to use it to send and receive college-related email. Students are required to maintain the privacy of their AC login credentials. Sharing network credentials poses a security risk and is subject to disciplinary action. Your responsibility to protect your login credentials is governed by the [Information Security Policy IT01](#). Support is available through the college Information Technology Service (ITS) at: <https://www.algonquincollege.com/its/>

Mental Health and Wellness Supports

Canada has launched a national Suicide Helpline at www.988.ca and a wide range of mental health and wellness resources for Algonquin students are available at www.algonquincollege.com/SSS/student-health-wellness.

Student Course Feedback

Algonquin College invites students to share their course experience by completing a student course feedback survey for each course they take. For further details consult Algonquin College Policy [AA25: Student Course Feedback](#).

Use of Mobile Devices in Class

With the proliferation of small, personal mobile devices used for communications and data storage, Algonquin College believes there is a need to address their use during classes and examinations. During classes, the use of such devices unless authorized by your professor can be disruptive and disrespectful to others. During examinations, the use of such devices is generally prohibited unless authorized by your professor. Otherwise use is considered academic dishonesty in the form of cheating. For further details consult Algonquin College Policy [AA32: Use of Electronic Devices in Class](#).

Technology Requirements

Students are required to have access to a computer and to the internet. There may also be additional technology-related resources required to participate in a course that are not included in the course materials fee, such as headphones, webcams, specialized software, etc. Details on these requirements can be found in the Weekly Schedule document of the course for each course available on Brightspace.

Transfer of Credit

It is the student's responsibility to retain course outlines for possible future use to support applications for transfer of credit to other educational institutions.

Safe Harbour

In the event of an unexpected major event (pandemic, etc.), your course may have changes that are not reflected in the Course Outline. Should this happen, the Weekly Schedule document will have updated information about your course.

Other Information

Students are required to respect the confidentiality of employer, client and/or patient information, interactions, and practices that occur either on Algonquin College premises, or at an affiliated clinical/field/co-op placement site. Concerns regarding clients, patients, and/or employer practices are to be brought to the attention of the program coordinator, or designated field/clinical/co-op placement supervisor so that they

may be resolved collaboratively. Such concerns are not to be raised publically either verbally, in writing, or in electronic forums. These matters are to be addressed through established program communication pathways.
